

INTRODUCTION to the

Newton Marasco Foundation's Education on Energy and the Environment Kit

OVERVIEW

Today's students are tomorrow's leaders in environmental stewardship, and the lessons we teach now will help them develop a love for nature and the enduring sense of stewardship needed to wisely manage our resources for the future. To help foster this sense of stewardship among our youth, the Newton Marasco Foundation, a non-profit organization dedicated to inspiring the next generation of environmental stewards is pleased to bring you the Education on Energy and the Environment kit.

Education on Energy and the Environment includes engaging quiz-show format games that support the 2010 Virginia Standards of Learning for Science with a focus on the environment and stewardship. These easy-to-use, interactive games inject a sense of play in the classroom to make learning fun while encouraging student participation and focus. This kit has the tools and resources to help you—or your students—administer a variety of environmental games. We also provide a list of even more environmental education resources and links for you and your students to use.

WHAT IS IN THE KIT

You'll find the following in our Education on Energy and the Environment kit:

- Instructions and Tips
- PowerPoint slideshows with the games, along with additional information, discussion questions, and references
- Scorecards
- Spreadsheet with a list and links to additional environmental education resources, such as lessons, games, and activities, for you and your students
- Evaluation form—we welcome and encourage your feedback and comments on this toolkit!

To download any part of the kit, visit www.NewtonMarascoFoundation.org. They are included in our Teach Green section.

OUR THANKS

Education on Energy and the Environment was made possible through a generous grant from the Luck Stone Foundation, and developed in cooperation with the Loudoun County Public Schools in Virginia, and through the time and expertise of many Newton Marasco Foundation board members and volunteers from our corporate partners.

We hope you and your students enjoy Education on Energy and the Environment.
